dAPP Controls

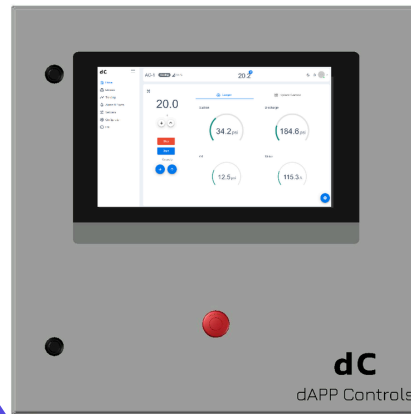

digital automation partner platform

SENTRY

COMPRESSOR CONTROL

Powered by robust components, a simple operator interface, & intelligent notifications - the Sentry provides best-in-class monitoring!

Where to Apply?

The dC Sentry compressor controller can be installed on nearly any new or existing refrigeration compressor package. The list of manufacturers includes:

MYCOM

KOBELCO

Vilter

STAL REFRIGERATION

Installation

Our carefully engineered design allows you to easily install our controller in just a few hours without the need of proprietary tools or components. Setup is a breeze with a few selections and inputs!

Key Benefits

Safety

Communications between sensors and controllers ensures that proper measurements are taken along with instrumentation health. Never worry about improper scaling that could lead to refrigerant leaks!

Reduced Downtime

Accurately monitor machine and sensor health to schedule preventive maintenance shutdowns that align with production schedules.

Peace of Mind

Get notifications to your phone, email, text with your preferred settings to avoid extra work in nuisance trips and troubleshooting.
