SENTINEL

VIBRATION MONITORING SYSTEM

Providing optimal vibration monitoring to keep your process running & extending the lifecycle of your equipment!

Where to Apply?

The dC Sentinel vibration monitoring system is compatible with a wide range of compressor manufacturers and can be installed on new or existing screw or reciprocating compressors.

Integration

The Sentinel can easily be connected to a variety of control systems using hardwired inputs/outputs and/or via communications: Ethernet/IP, Modbus TCP/IP, or PROFINET

Key Benefits

Equipment Health

Get the most out of your industrial refrigeration equipment with continual vibration monitoring to prevent damage and unplanned maintenance!

Reduced Downtime

Early detection of wear can prevent losses of varying magnitudes - Sentinel provides quick insight into potential issues before they become problems!

Peace of Mind

Get notifications to your phone, email or text with your preferred settings to avoid extra work in nuisance trips and troubleshooting.
